11. Be sure "Restart your computer" is checked and select "Finish" to reboot the system.

12. After the system restarts, select "Yes", to convert DB to the new version's format.

(Note: an empty database takes 5 seconds; a full database can take minutes to hours)

Next, you need to copy the "C drive image" into Hidden partition area for "Recovery from HDD" function.

13. After the system and application starts, log in and exit the DVR application.

14. From the Windows "Start" menu, select "Programs"=>"WinClon"=>"Recovery Solution"

15. If asked, Select "Cancel" on Product ID Dialog, (even if a serial number has been entered) (or if asked for a password, select "OK" with no password)

ок	Cancel
	ОК

#### 16. Click "OK"

## 17. Click "Uninstall" to uninstall
