### 3

## Make Connections

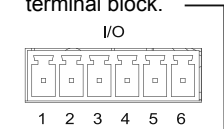

### ● Install the Video Server to an Ethernet Network

1. Make video connection from the camera to the BNC video input.

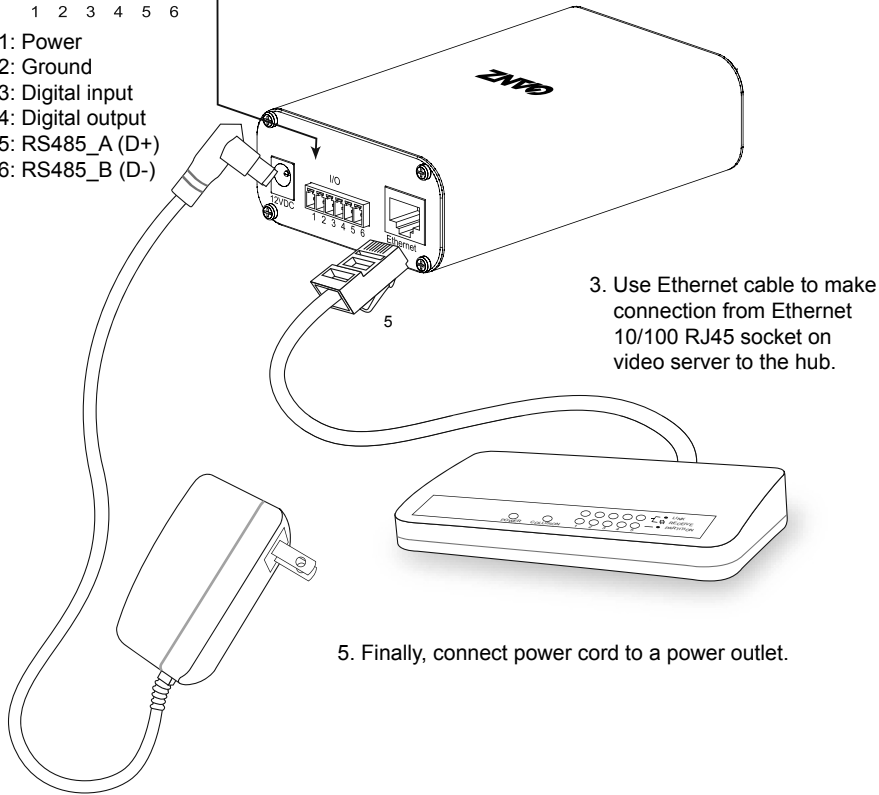

2. Make audio connection from the Line-Out audio source to the RCA audio input.

4. If you have external devices such as sensors and alarms, make connection from I/O terminal block.

- 1: Power
- 2: Ground
- 3: Digital input
- 4: Digital output
- 5: RS485\_A (D+)
- 6: RS485\_B (D-)

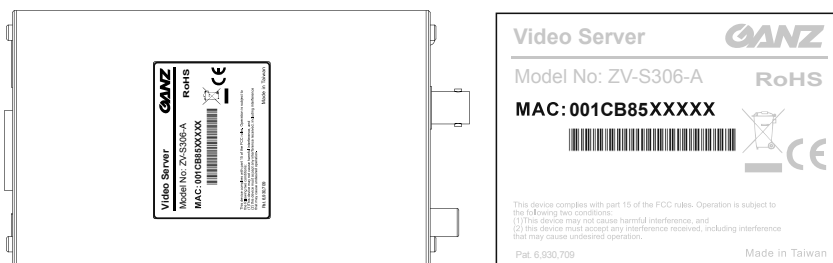

3. Use Ethernet cable to make connection from Ethernet 10/100 RJ45 socket on video server to the hub.

5. Finally, connect power cord to a power outlet.

## 4

## Assign IP Address

- A** Note the MAC from the product label of your device.

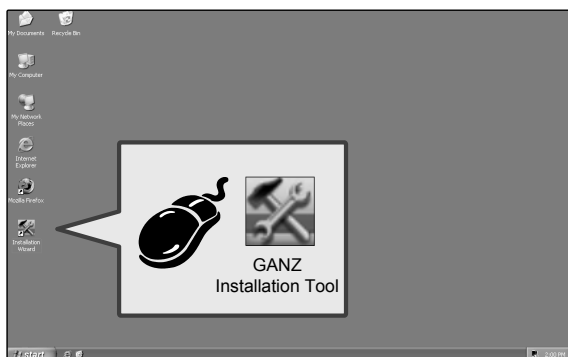

This serial number is same as Ethernet address,  
for example: 001CB8500002=00-1C-B8-50-00-02

**B** Assign IP address

● Using GANZ Installation Tool program

1. Install the "GANZ Installation Tool" under the Software Utility directory from software CD.
2. Run the "GANZ Installation Tool" program.

- From the "GANZ Installation Tool" window, click on the MAC that matches the one you just noted from the product label of your device to connect the Internet Explorer to the Video Server.

**Video Server**

**Model No: ZV-S306-A**

**MAC: 001CB8500002**

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:  
(1) This device may not cause harmful interference, and  
(2) This device must accept any interference received, including interference that may cause undesired operation.
